RapidTag
BY **ASPE** PRINTING TECHNOLOGIES

LIGHTNING

The Ultimate Machine for Printing Tagless Labels

Size Counter

Flash Cure

Automatic Size Changing

Shirt Detector

The RapidTag Lightning makes the relabeling process so much easier. Instead of having to burn multiple screens for size labels, and having to re-register each design, now all the size labels are on one screen and you change to the next size label by clicking the desired size on the touch screen. **The Lightning Machine** also counts each size that you have been printing.
